St. Michael's School Satisfaction Survey Results Focus: Sports Program -- 2005 / 2006

This letter focuses on survey results and comments relating to SMS's Sports Association program. Not surprising is parent's overall satisfaction: 94% of those who responded are satisfied with the Sports Association program. Further evidence of parents' satisfaction are the positive comments surrounding how well these programs are run, the dedication of coaches and the focus on good sportsmanship.

Sports Association survey participation peaked to include even those who did not participate in this year's sports program when asked if an additional sports programs were offered, would your child be interested in participating. Many parents expressed interest in multiple sports. One parent did question the feasibility of SMS offering additional programs given Cranford's already successfully and established town sports programs. This and other questions are research for the Sports Association Board.

Below are parent's results when asked:

If offered, would your child be interested in participating in:

Soccer:	45	Softball:	19
Fall Track:	30	T-ball:	13
Baseball:	22	Field Hockey:	7
Lacrosse:	21		

Two parents cited a need for better communication, specifically requesting a pre-season parent overview including practice and game schedules. With 97% of survey responders preferring school email communication, the Sports Association should consider communicating entirely via email.

Many parents cited interest in supporting Sports Association positions and 7 parents submitted their names.

Thank you for taking the time to participate in this survey. It is through parent's dedication and feedback that we can continue to build upon our successes.
